

## How to Print Your Own Know MSG Stickers at Home

### What You'll Need:

- Know MSG sticker sheet (found on below page)
- Inkjet Printer
- 8 x 11-inch Vinyl Paper
- Scissors

### How to Print:

1. Insert vinyl paper (available online or at most office supply stores) into your printer's paper tray. Make sure the adhesive side of the paper is facing up so that the stickers print on the non-adhesive side.
2. Print the Know MSG Sticker sheet using the vinyl paper. You should not need to adjust printer settings for paper type.
3. Once printed, let the page dry.
4. Use sharp scissors to cut out stickers.
5. Peel backing from the sticker just as you would with a store-bought sticker.
6. Stick your sticker everywhere! Don't forget to tag #KnowMSG on social media to show us where you're spreading the word!
