

Innovations in Nutrition from Ajinomoto

“TO REALIZE GREATER WELLNESS FOR
PEOPLE ALL AROUND THE WORLD”

- DR. KIKUNAE IKEDA

Rooted in a strong desire to improve the health of the Japanese people, Tokyo scientist Dr. Kikunae Ikeda discovered the first umami seasoning (monosodium glutamate) in 1908 with the intent to enhance the deliciousness of nutritious food. Shortly thereafter, this seasoning was brought to market as AJI-NO-MOTO®, and a company was born, grounded in an ideal that we continue to operate by today: “Eat Well, Live Well”.

Over one hundred years later, we continue to create innovations in nutrition to meet the needs of people around the world based on extensive research and Amino Science, our unique approach to identifying the infinite possibilities of amino acids to advance human health.

PRODUCTS

For people with serious metabolic disorders and chronic medical needs to healthy individuals looking to enhance their physical performance or personal wellness, we offer flavorful, convenient options based on extensive scientific research using the highest quality ingredients.

INGREDIENTS

We are the leading experts in umami, offering a diverse array of ingredients to the food sector that enhance the fifth basic taste, while reducing the need for sodium. Combined with our low-calorie sweetener options, we offer a variety of food ingredient solutions that make foods and beverages taste delicious, with less salt and sugar.

COMMUNITY

Our commitment to human health extends beyond our products and ingredients. Through partnerships with local governments, schools, and public health advocacy groups, we have helped improve the nutritional status and wellbeing of vulnerable communities in Japan, Vietnam, Thailand and other countries.

Eat Well, Live Well.
